RYAN AKMAL PASYA

Full-Stack Developer | TypeScript, React, Node.js

Aceh, Indonesia | Open to remote roles

ryan@nylo.me | github.com/ryanakml | nylo.me

PROFILE

Self-taught full-stack developer focused on TypeScript, React, Node.js, and PostgreSQL. Personal projects span WhatsApp support applications and Go-based workflow infrastructure, alongside merged contributions to established open-source projects.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, Python, SQL

Frontend: React, Next.js, Tailwind CSS, TanStack Query and Router

Backend and data: Node.js, Express, PostgreSQL, Redis, REST APIs, Convex

Tools and testing: Docker, AWS EC2, GitHub Actions, Vitest, Playwright, Git

SELECTED PERSONAL PROJECTS

FlowDesk AI | WhatsApp support platform | Repository

TypeScript, React, Express, PostgreSQL, Redis, Docker

- Built dashboard and API features for conversations, channels, knowledge uploads, and team roles in a multi-tenant WhatsApp support application.
- Implemented signature-verified webhook ingestion backed by a PostgreSQL outbox, with workers for event normalization and outbound delivery.
- Added PostgreSQL integration tests for tenant isolation, event replay, and competing workers; configured CI checks and container builds with GitHub Actions.

Deadbolt | Workflow engine in active development | Repository

Go, PostgreSQL, NATS JetStream, TypeScript

- Built control-plane and worker components for durable workflows, with PostgreSQL-backed state and lease renewal to coordinate worker ownership.
- Implemented an outbox dispatcher with retries and stable event IDs; added lease and recovery tests for broker outages and message redelivery.

Wabrix | WhatsApp inbox with managed services | Repository

Next.js, Convex, Clerk, Cloudflare Workers, Hono

- Built a WhatsApp support application combining a Next.js operator inbox, Convex real-time backend, Clerk authentication, and an edge webhook ingress.

SELECTED OPEN SOURCE CONTRIBUTIONS

OpenHands | React frontend | Merged PR #12223 and #12219

- Added chat loading skeletons, improved conversation routing stability, and fixed modal close handling through maintainer-reviewed changes.

Mastra | TypeScript | Merged PR #15346

- Fixed function-based tool approval handling and added tests for callback and boolean configurations.

Celery | Python | Merged PR #10739

- Fixed home-directory expansion in spawned-worker working-directory paths and added a regression test.

EDUCATION AND TRAINING

Universitas Syiah Kuala | Computer Engineering, on academic leave

IBM Full Stack Software Developer Professional Certificate | Coursera

Languages: Indonesian (native), English (working proficiency)
